

## Wall Lining Dimensions

## Minimum Wall Lining Dimensions (mm

The appliance must be installed prior to and behind the finished wall surface. Take into account any plaster board, tiles or any other finishing surface that may be intended for the finished wall surface.

Wall finishing materials must not encroach upon the minimum cavity clearances shown.
The wall board that lines the outside of the opening can be normal 13 mm plaster board and does not need to be noncombustible.

## Finish

## Finishing Detail

## Flue Information

Flue Configuration (If less than 8 m flue length is required)
If your flue system is less than 8 m long (as shown in the diagrams below), then a simple aluminium flexible flue is required.

If your flue system is greater than 8 m long, then please contact the Escea Advisory Team at aa@escea.com for further guidelines.

## Clearances

## Chassis and Flue Clearance

The fire chassis is zero clearance rated.
A 50 mm clearance must be maintained from the exhaust flue for the first 1.2 m of flexi flue from the appliance (see diagram below).

## Television Clearances

The diagram (shown right) shows the recommended minimum
clearances for the location of any electrical equipment (such as
Plasma TV, LCD TV or home theatre) above a DS1400 gas fire
A mantel/recess is not required to comply with our recommendation of TV installation.

Note: dimensions from the top edge of the glass frame
Note: The television clearance recommendations below are to be treated as a suggestion of a suitable installation only. It is the responsibility of the end user to check the installation instructions of their electrical appliances to ensure that the location in relation to the gas fire is suitable. Escea in no way guarantees or takes responsibility that the above installation suggestion will be suitable for all electrical or home entertainment appliances.

## Mantel Clearance

Please refer to the diagram. Mantels or protruding ledges above the heater must not
be installed lower than the dimension shown
Note: dimension from the top edge of the glass frame.

## Cavity Base

This appliance MUST be fully supported on its base, over the entire area of the underside of the appliance. The base must also be level and strong enough to support the total product weight, which is approximately $\mathbf{1 5 0 k g}$.

The fireplace can be recessed into the ground but must maintain clearances detailed in the diagram shown right for any combustible flooring materials.

The fireplace must be seismically restrained in a manner appropriate to the installation location
