

Prolonged unprotected exposure to heat may be detrimental to the appearance or long term performance of a wall lining. Combustible and heat sensitive wall linings or finishes must not protrude past the trim, to the glass viewing area. Some scenarios will require the use of an Extended Trim Kit, or a custom solution, to provide adequate protection.

Tile Detail

scale 1:1

Notes:

- All dimensions are in mm. DO NOT SCALE OFF THESE DRAWINGS
- This detail is to assist in the installation of a **frameless finish** to a DS, DN, KB or KS Series Gas Fireplace.
- This detail is applicable for all for sides of the fireplace glass viewing area.
- This detail will use the 22mm Extended Trim Kit to protect overhanging cladding edges at the opening of the fire.
- Escea recommends when using these finishing methods that **10mm Fibre Cement Sheet** is used.
- Black fireplace trim must be able to be removed - ensure any adhesive or compound is kept clear.
- This technical sheet must be read in conjunction with the requisite Escea or MODE Installation Manual, the latest version can be found on our website at www.escea.com or www.stokefires.com
