**Linear Trim** scale 1:10

**note:**

- DO NOT SCALE OFF THESE DRAWINGS. All dimensions are in mm.
- Fascia do not reduce the visible area of the glass opening.
- Dimensions for fascia profiles do not differ across the DS fire range.
- The Linear Trim is a friction fit to the inside of all four sides of the black reveals at the glass opening of the fire.
- Bevelled fascia spigots fit into preformed holes in the fire chassis - ensure cutouts are available in the wall lining when using the bevelled fascia.
- This technical sheet must be read in conjunction with the Escea DS Series Installation Manual, the latest version can be found on our website [www.escea.com](http://www.escea.com)
