

KS Series - Frameless Finish in Drywall

Prolonged unprotected exposure to heat may be detrimental to the appearance or long term performance of a wall finish. Combustible and heat sensitive wall panels or finishes must not protrude past the trim, to the glass viewing area. Some scenarios will require a custom solution, to provide further protection.

chase framework at minimum chase opening height			
$\frac{1}{2}$ or $\frac{5}{8}$ " (12 or 16mm) drywall			
drywall finishing compound			
wall panel fixing bracket self-tapping screw (if required) and adhesive fixing to wall panel fixing bracket
